Education

Government College of Engineering, Nagpur *(2018-2022)* (B.E.) Computer Science and Engineering 87%
Dr. Ambedkar College, Nagpur *(2016-2018)* (HSC) Science 83%
Narayana Vidyalayam, Nagpur *(2016)* (SSC) 97%

Experience

AIQoD - AI/ML Developer (Generative AI) *May 2025 – Present*

- Designed and developed scalable agentic application which creates fully functional screens with Full-Stack functionality.
- Developed a modular **multi-agent architecture** using LangGraph and LLM orchestration, enabling autonomous tool generation, dynamic tool selection, and workflow execution.
- Built **Retrieval-Augmented Generation (RAG)** pipeline using vector databases (Pinecone), Transformers and LLMs to analyze banking regulations, retrieve relevant context, and generate compliance reports in under 60 seconds.
- Designed and developed an **AI-powered lead generation system** leveraging web scraping, semantic filtering, and LLM-based information extraction to identify high-quality prospects from websites, forums, and social media.

Unified Mentor - Data Science Intern *Dec 2024 – Feb 2024*

- Built and **optimized machine learning models** using Python and SQL, increasing data **accuracy** by 20%.
- Delivered actionable insights through MediGuide and Retention360 projects using advanced data analysis and Power BI

Internship Studio - Data Analyst Intern *Jun 2024– July 2024*

- Performed data preprocessing, feature engineering, and model development using Python and SQL, improving prediction accuracy by 25%.
- Designed **interactive dashboards** in Power BI and Excel, enabling **faster** data-driven decisions.

SevenX - Associate Software Engineer Trainee *Feb 2022– June 2022*

- Contributed to Salesforce application development with a focus on building reusable components using LWC, improving UI efficiency by 20% and enhancing cross-team collaboration.
- Optimized **API integrations and web services**, reducing data retrieval time by 30%

Projects

Orkestrix - AI-Powered Screen & Workflow Builder
Python, LangGraph, LLM integration, FastAPI, Prompt Engineering, MongoDB, Angular, AWS

- Designed and developed an **AI-powered full-stack screen builder** that converts natural language prompts into fully functional **Angular frontend screens and synchronized Python backend APIs**, **automatic UI-to-backend synchronization**
- Built a **workflow orchestration system** enabling users to connect multiple screens and tools into complete application pipelines using **LangGraph-based architecture**. Supports reusable screens, tool integration and app creation.

NavGo: Indoor Navigation App
Java, Android Studio, Git

- Led a group for development of an indoor navigation system for campus premises, featuring real-time location tracking and optimized pathfinding**, reducing navigation time for new visitors by 40%**

Skills

Programming Languages: Python, HTML, JavaScript, SQL (Database Management), NoSQL
Data Science: Machine Learning (Supervised, Unsupervised Learning), NLP, Feature Engineering, Statistical Analysis, Model Training & Optimization, Predictive Modeling, Exploratory Data Analysis (EDA), ETL Pipelines, Data Cleaning, Model Deployment
AI & Agentic Systems: LangChain, LangGraph, CrewAI, Hugging Face, Prompt Engineering, LLM Integration (OpenAI, Gemini, Claude), AI Agent Orchestration, MCP, Autonomous Tool Generation, Prompt Engineering, Tool Calling, Context Engineering, RAG, Embeddings, Vector Databases (Pinecone), Multi-Agent Systems, FastAPI/Flask microservices, API design,
Libraries & Frameworks: NumPy, Matplotlib, Pandas, Scikit-learn, Seaborn
Cloud: AWS (S3, EC2, RDS, Lambda, VPC, IAM, etc.), Containerization (Docker)
Tools & Platforms: Git, GitHub, Cursor, SDLC, APIs, Web Scraping (Playwright, BeautifulSoup, Social Media Scraping)
Certificates: AWS Certified Cloud Practitioner, Machine Learning (Coursera)
